

SCIENTOMETRICS

ANNOUNCEMENT AND CALL FOR PAPERS

The organisers of the 11th *International Conference on Scientometrics and Informetrics* and the Editors of the journal *Scientometrics* have agreed upon the publication of selected conference papers in a dedicated issue of *Scientometrics*. This special issue will be edited by Wolfgang Glänzel and Henk Moed.

Authors of full papers accepted for oral presentation are asked to submit the final version of their contribution as Microsoft Word, RTF or PDF document no later than **15 September 2007** to Wolfgang.Glanzel@econ.kuleuven.be. Note that this deadline is stringent. The selection criteria are as follows:

- The paper was presented at the Conference, and has been accepted for the Conference Proceedings.
- The submission is an original contribution and the paper has not yet been submitted to or published in any other journal.
- Papers based on ‘project-in-progress’ contributions can only exceptionally be accepted.
- Papers accepted for poster presentation or submitted beyond the above deadline cannot be considered for publication in the issue.
- Papers will be reviewed according to the standards of *Scientometrics*.
- Further criteria are scope, quality and length.

Authors are asked to organise their paper according to the guidelines for contributors as described in each issue of the journal. The dedicated issue admits the publication of about 15-20 contributions (depending on the selected papers' length). Submitted papers should therefore not exceed 15 pages (including tables and figures).
